One of AutoCAD's most notable features is its ability to work directly with 3D CAD software through its use of the DWG and DXF file formats. In the 1980s, users could import a 3D CAD model into a drawing (as opposed to the more common and widely used "layer-based" CAD models) and place it in the drawing. Then, if the drawing was saved in DXF format, the drawing could be opened in AutoCAD and the imported model would be displayed. On May 11, 2014, Autodesk made available its 2012 version of AutoCAD. This has an initial price of US\$1799.00 for a perpetual license. The 2012 release also includes support for multiple 2D and 3D file formats. New enhancements include the 3D Web Modeling Project Viewer, the IPTC Metadata Extension, AutoCAD's ability to open drawing files in DWG and DXF format, which allows compatibility with the latest 3D CAD software, and the ability

to import JPEG, PDF, EPS, and TIFF files. AutoCAD also features a (web based) Cloud Computing API which provides integration with Google Drive, Microsoft OneDrive, Box.com and others. Mobile AutoCAD Mobile is available for Android and iOS devices. The app was first released on March 29, 2012. AutoCAD Mobile for iOS was released in May 2012. It has an API, allowing plugins to be made.

The current version is 3.5.3 and it costs US\$17.99 per year to update it. Features Products and features AutoCAD is a three-dimensional (3D) computer-aided design (CAD) program. It uses a 2D geometry to draw 3D objects. Interoperability Autodesk's DWG, DXF, STP, and dxf format files can be opened and edited in other CAD and CADD software. Interoperability is possible between any program that can read DWG and DXF files and AutoCAD, including Autodesk's own Inventor and Revit software. One of Autodesk's first products to use this technology was Autodesk Animator, a software package that let users convert two-dimensional (2D) images into 3D animation. This interoperability allows for the creation of highly complex drawings, which would be very difficult or even impossible to create with any other ca3bfb1094
