1.0.0 12/25/2010 - If you find a bug in the product or know that there is a better way to do this, please submit a bug report on the comments field below.

I've used another drive visualization thingie recently. It's called Drive Dream and is open source (MIT license). It does many things, but I like the way it manipulates drives in a virtual sandbox. There is an option to "hide" drives when click an image and it shows how much free space is available on the target drive. Here is an example of how it looks: [Hidden Drives](#) Once you click on an image it gives you information about that drive in a large window. It has the following features:

- Mount or unmount a drive
- Mount the drive with a specified label
- Automatically mount a given device
- Unmount a drive

- Access drives in the lists: computer/disk/mount/ - b7e8fdf5c8

MacLikeDriveDisplay Activation Code

Dashboard Widget that displays a list of mounted drives. Only the icon and label of the mounted drives are shown. To eject a drive, double click on the icons. To access the files on a mounted drive, single click on the icon of the device. MacLikeDriveDisplay Screenshot: MacLikeDriveDisplay Usage Screenshot: Use the options like visible, sort order, sort by name and labels to get the display which you like most. MacLikeDriveDisplay Option device icon image: Controls, what to use as device icon image. To clear the configuration of the device icon image clear it. Option Labels: MacLikeDriveDisplay Option label: Show the labels of the mounted devices. MacLikeDriveDisplay Option sort by label

What's New in the MacLikeDriveDisplay?

MacLikeDriveDisplay allows you to connect to a network volume via your

LAN and to access its contents on Windows PCs running Windows 2000, Windows XP, Windows 2003 and Windows Vista. It detects the target and opens a standard floppy disk drive, just like Mac drives are opened in Microsoft Windows. Requirements: ☐ Yahoo! Widget Engine

DriveImageListDescription: This Widget dynamically arranges drives on your screen. It lets you eject any ejectable mounted device by double clicking the eject symbol. By double clicking on the drive image, it will be opened in WinExplorer. If you drop a file on the drive image this very file will be moved to the specified volume unless the target is an optical device. Optionally it can display the drive size, the free space on the volume and the drive label. The images used in this Widget are freely available on the net, and so far are not under any copyright. I do not take credit for any of those images. Requirements: ☐ Yahoo! Widget Engine
