Ok, so serial numbers are not totally black or white. But they can make an important contribution to the puzzle that tells you the watch is a Maybe or No-Go. First, know where to find the serial number on every Rolex older than 2008 you'll find it between the lugs at the 6 o'clock side. From 2005 to 2007-ish the serial is also inscribed on the rehaut, which is the interior flange between the dial and top of case. After 2007 it was only inscribed on the rehaut. In Flip PDF Pro, you can use different templates to present

flipbooks with different layout and tool bar features. You can also customize your stylish eBooks with dozens of template settings. Multiple pre-designed Templates, Themes, Scenes and Backgrounds are ready for you to use directly. And you can also add plugin to the book: banner, news rotator, image slider, music player, YouTube video banner, etc. There are also many online resources available now: multiple templates, 400+ themes, 200+ scenes and 700+ backgrounds. More stunning and amazing templates and other resources will be published in future. Oh geez. Now were into the extreme esoterica of vintage Rolexes. But checking the typeface of the serial and reference numbers on the case is another piece of the puzzle that could disqualify a watch from consideration. There are at least 5 known typefaces, including one which is the service dial font (hint: important). There is a ton of information in this Vintage Rolex Forum (VRF) thread from user Xeramic but heres a

summary table of the typefaces with corresponding production years. You'll see considerable overlap so only concern yourself with outliers:
