the clock and weather skins are unique in that they give you both a clock and weather skin, each with their own clock face. what's nice about this is that if you have the clock and weather skins, you can decide which of them you want to use, and can choose the clock face of your choice. each of them has the weather skin on the bottom, so you can just easily check the weather. despite the fact that it's not an actual clock, we thought that desktop clock was a cool theme, because it does exactly what it says on the tin. the theme has three skins, which you can switch between in the theme's preferences, and a clock is loaded into the desktop, as we've said. it's easy to navigate, and you can adjust the clock's style, including the clock face. you can also choose the clock's time format, whether you want a 12 or 24-hour display, and its color. the clock itself is black, but can easily be changed, and it's animated. there are two clocks on this page, one digital and one analog, both with a dark gray clock face and a light gray hands, making it easy to read. the digital clock can be clicked on to change the time, while the analog clock can be moved up or down to set the time. they both have a lot of themes to choose from. this theme has no clock face, but it does have a clock. the theme looks good, and its colors are lovely. it lets you choose between a digital or analog clock. both of them have a lot of options, including what color the clock face is, what color the numbers are, and the size of the clock face. there are also a few clock styles to choose from. for example, you can choose whether the clock is on top or at the bottom of the desktop, what color the clock hands are, and whether the clock is a digital or analog clock.

Vista Desktop Clock Skins
